

NEW PRODUCT

Shearwell ASET HDX Indicator + Visual Set for Goats

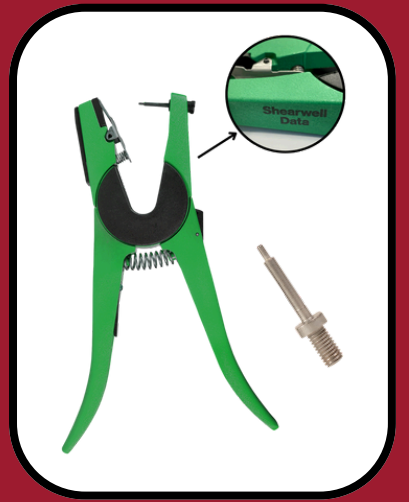

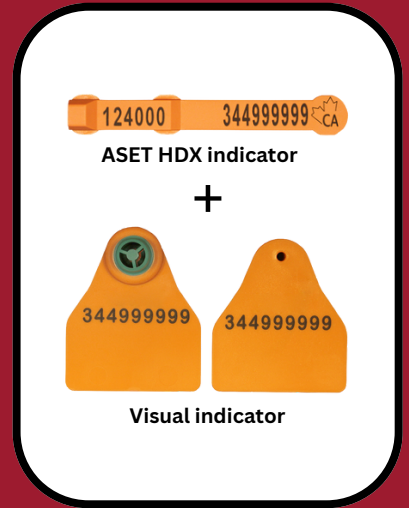

Shearwell Goat ASET HDX Indicator + Visual Set

Pre-approved in preparation for new regulations, the Shearwell Goat ASET HDX Indicator + Visual Set is the latest goat traceability indicator option from Canadian Cattle Identification Agency (CCIA).

Matched sets help producers manage risk while also supporting herd management with the addition of a visual indicator. The visual indicator's purpose is to provide a record of the CCIA ID if the pre-approved ASET HDX indicator is lost. The visual indicator alone is NOT an approved animal indicator.

The ASET HDX indicator is applied with its Shearwell Goat ASET Indicator Applicator (SH0010574) and the visual indicator is applied using the new Shearwell Goat Visual Indicator Applicator (SH0010000).

Indicators, applicators and replacement pin are now available to order direct from the CCIA Webstore.
